Q7. Read the given passage and answer the questions that follow.

Water Pollution is a major problem of modern times. The pollution that enters our water bodies comes from various sources like chemical wastes from factories, wastes from hospitals and chemical sprays applied to crops. When that water mixes with domestic and other waste, the water becomes even more polluted. The chemical added to the rivers make the water poisonous and kills hundreds of fishes in the rivers. Polluting water sources have also infected the drinking water supplied to major cities and villages and this has caused serious health problems and destruction of flora and fauna. Strict measures should be taken by the government and the citizens to save water sources. The Supreme Court has directed the government to clean rivers and provide hygienic and pollution free atmosphere to the citizens as it is their fundamental right.

(i) From where does the pollution enter our water bodies?

(ii) How is water pollution harmful for the fishes?

(iii) How has polluted drinking water affected the life of human beings?

(iv) What instructions have Supreme Court given to the government?

(v) Complete the sentence: _____ is the fundamental right of citizens.

(vi) Find antonyms from the passage:

i) solution _____

(ii) construction _____

vii) Make Sentence of your own by using word“ poisonous’
