GEOGRAPHY

Volcanoes are openings, or vents from where lava, tephra and steam erupt onto the Earths surface.

Volcanic eruptions can last days, months or even years. They provide a number of environmental benefits, for example: fertile soils, hydrothermal energy, and precious minerals.

But they also pose several hazards: volcanic ash, gases, lahars, landslides, lava flows, and pyroclastic flows. Volcanic eruptions can be deadly and often cause population displacement and food shortages.

Make an in-depth case study on the volcanic activities taking place in volcano: Ruang of Indonesia.
